## PROJECTS

Job Portal System

11/2023 Present

Job Portal Website is a web-based application. It helps job seekers to search and apply to available jobs and allows companies to post jobs to the website to be available to job seekers. It built with PHP, HTML, CSS, JAVASCRIPT, and MySQL programming language.

I'm currently developing it.

Smart Personal Assistant

05/2023 - 07/2023

Smart Personal Assistant (SPA) is a desktop-based application. It oversees computer tasks by voice or typing. SPA uses natural language processing to convert voice commands to text. It designed and developed with Python programming language and Tintin.

## Hotel Managment System

📅 2022 - 02/2022

Hotel Management System is a desktop-based application. It automates the manual tasks of hotel by allowing user to add, update, delete rooms and users. It also registers, search visitors in a database. It developed by C# and MSSQL.
